

## **IMAS REVIEW BOARD - WORK PLAN 2006**

The aim is that each IMAS will be reviewed on a tri-annual basis. This reflects the requirements of ISO, on which the IMAS system is based, and also allows for sufficient experience to be gained of the use of a particular IMAS before official review.

Notwithstanding this, an IMAS can be reviewed at anytime should there be an urgent operational need or comment from a field user.

The 2006 work plan discussed in the Review Board meeting of 23 September 2005 will be:
